

# Make safety a priority with **Pave it Safe**<sup>TM</sup> rubber safety pavers

**Great for:** under play equipment, entire playgrounds, toddler play areas

...a great lower cost soft fall alternative providing an impact-absorbing surface to reduce playground injuries & provides a clean safe play area

## Why choose **Pave it Safe**<sup>TM</sup>?

- Complies with Australian safety standards
- For use in childcare centres to backyards.
- Easy DIY self install or professional installation
- Pavers can be easily removed & re-located
- Suits small to large play areas
- Made from recycled materials
- Great cost savings
- A cleaner alternative to woodchips

## Added Benefits:

- No messy glues or concreting
- Virtually maintenance free
- Anti-slip and non abrasive
- Aids wheelchair access
- Easily replace damaged pavers
- Hard wearing & durable
- Allows play year round as water drains away quickly

# Make safety a priority with **Pave it Safe**<sup>TM</sup> rubber safety pavers

**Great for:** under play equipment, entire playgrounds, toddler play areas

## Two Thicknesses Available

Pave it Safe Pavers come in the form of large sheets/slab style for easy laying. Pavers are 900mm x 900mm in size & come in 2 thicknesses:

**25mm:** Suit laying on existing hard surfaces  
“Easy to lay, over existing flat surfaces eg: pavers, concrete, timber decks, crushed rock, etc...”

**45mm:** Suits laying on any dirt/grassed surfaces  
“These pavers are simply laid like normal pavers over crushed rock”

## What to do next?

- Measure area you need protected
- Decide which thickness 25mm or 45mm
- Call, fax or email for a free DIY or Professional installation quote
